

Job Openings as of December 2005

MPS' home office is a face paced environment where sales and inquiries are received faster than we can typically keep pace. MPS' products are focused in two main areas, Rotating Machinery and Magnetism. Both apply to many industries; Non Destructive Testing, Pipeline, Rotating Machinery, Petrochemical, Utility, Pipeline and any industrial application where rotating machinery operates or magnetism causes problems in processes or productivity.

Positions are based in MPS' home office in Holmdel, NJ. Some U.S. and International Travel may be required depending upon experience. U.S. Citizens or Permanent Residents only please. Only resumes emailed to JobsMPS@aol.com will be considered.

MPS Seeks an Electrical or Electronic Technician - This full time employee will be responsible for the testing, field installation, qualification, and possibly some upcoming design of MPS' manufactured products for use in our "Niche" area of expertise.

Position may involve the following tasks (will vary depending upon education and experience level):

- Provide test procedures for Assemblers/ Board Houses, Field Service Engineers and End Users.
- Assist in troubleshooting circuits/problems as necessary.
- Ensure timely procurement and tracking of parts using Parts and Vendors Database.
- Inspect incoming parts/components and log into inventory.
- Issue purchase orders, document component specifications/revisions.
- Produce drawings in AutoCad and documents in MS-Office.
- Answer client and customer Post-Sale Technical and Pre-Sales Inquiries.
- Assist with creation/review of Customer Documentation, Field Service Testing and Training Materials.
- Interface with customers and field reps to analyze product field problems.
- Oversee the installation, use and testing of MPS' Condition Based Monitors, Instruments and Demagnetizers.
- Prepare product designs, BOMs, etc. for Board Houses and Assembly Houses for both surface mount and through hole designs.
- Issue RMA's, Diagnose and Supervise the Repair of Returned Products.
- Field engineering - degauss/shaft voltage testing (training provided).

Candidates should have an Electronics Technician Diploma. Product and Technology training will be provided. Prior industrial experience is advantageous. Position located in MPS' home office in Holmdel, NJ. Some U.S. and International Travel required. U.S. Citizen or Permanent Residents only please. Only resumes emailed to JobsMPS@aol.com will be considered.
